Shimmian Rhinoplasty Clinic, Seoul, South Korea

**Venue :- Chairman's Club Resort,
Kodigehalli Main Road,
Sahakara nagar, Bangalore - 560092**

"Enhance Your Rhinoplasty Expertise: Join Prof Jung Dong Hak's Live Workshop in Bangalore 2023"

Dear colleagues, Welcome you all to Garden city Bangalore once again. The wait is over, Prof Jung Dong Hak is coming to Bangalore this year 2023.

Thank you for the overwhelming response to our 2019 live surgical workshop which has made our live surgical workshop most awaited events in the calendar. The success of the workshop is evidenced by the patients, young surgeons and experienced teachers in the field of rhinoplasty all around the world.

Why this workshop?

Nose is a vital organ with unique functions. You cannot imagine a human face without the nose. Nose is a projected part of the face, which gets attention very easily if there is any deformity. So normal / good looking nose is essential for any human being and perhaps Beauty of the eyes are enhanced by the good-looking nose.

Rhinoplasty procedure is considered as most complex and difficult surgery because we surgeons deal with 3-dimensional projected structure called nose. Revision nasal surgery is not acceptable by most of the patients and even difficult for surgeons. So, this workshop is going to guide the delegates, how to perform surgery to avoid revision surgery. Broadly we can divide rhinoplasty in to **functional and cosmetic rhinoplasty**.

Cosmetic rhinoplasty mainly enhances the beauty of the nose with the preservation of the nose functions. In our practice, common indications are crooked nose, deviated nose, saddle nose, bulbous nose and revision cases.

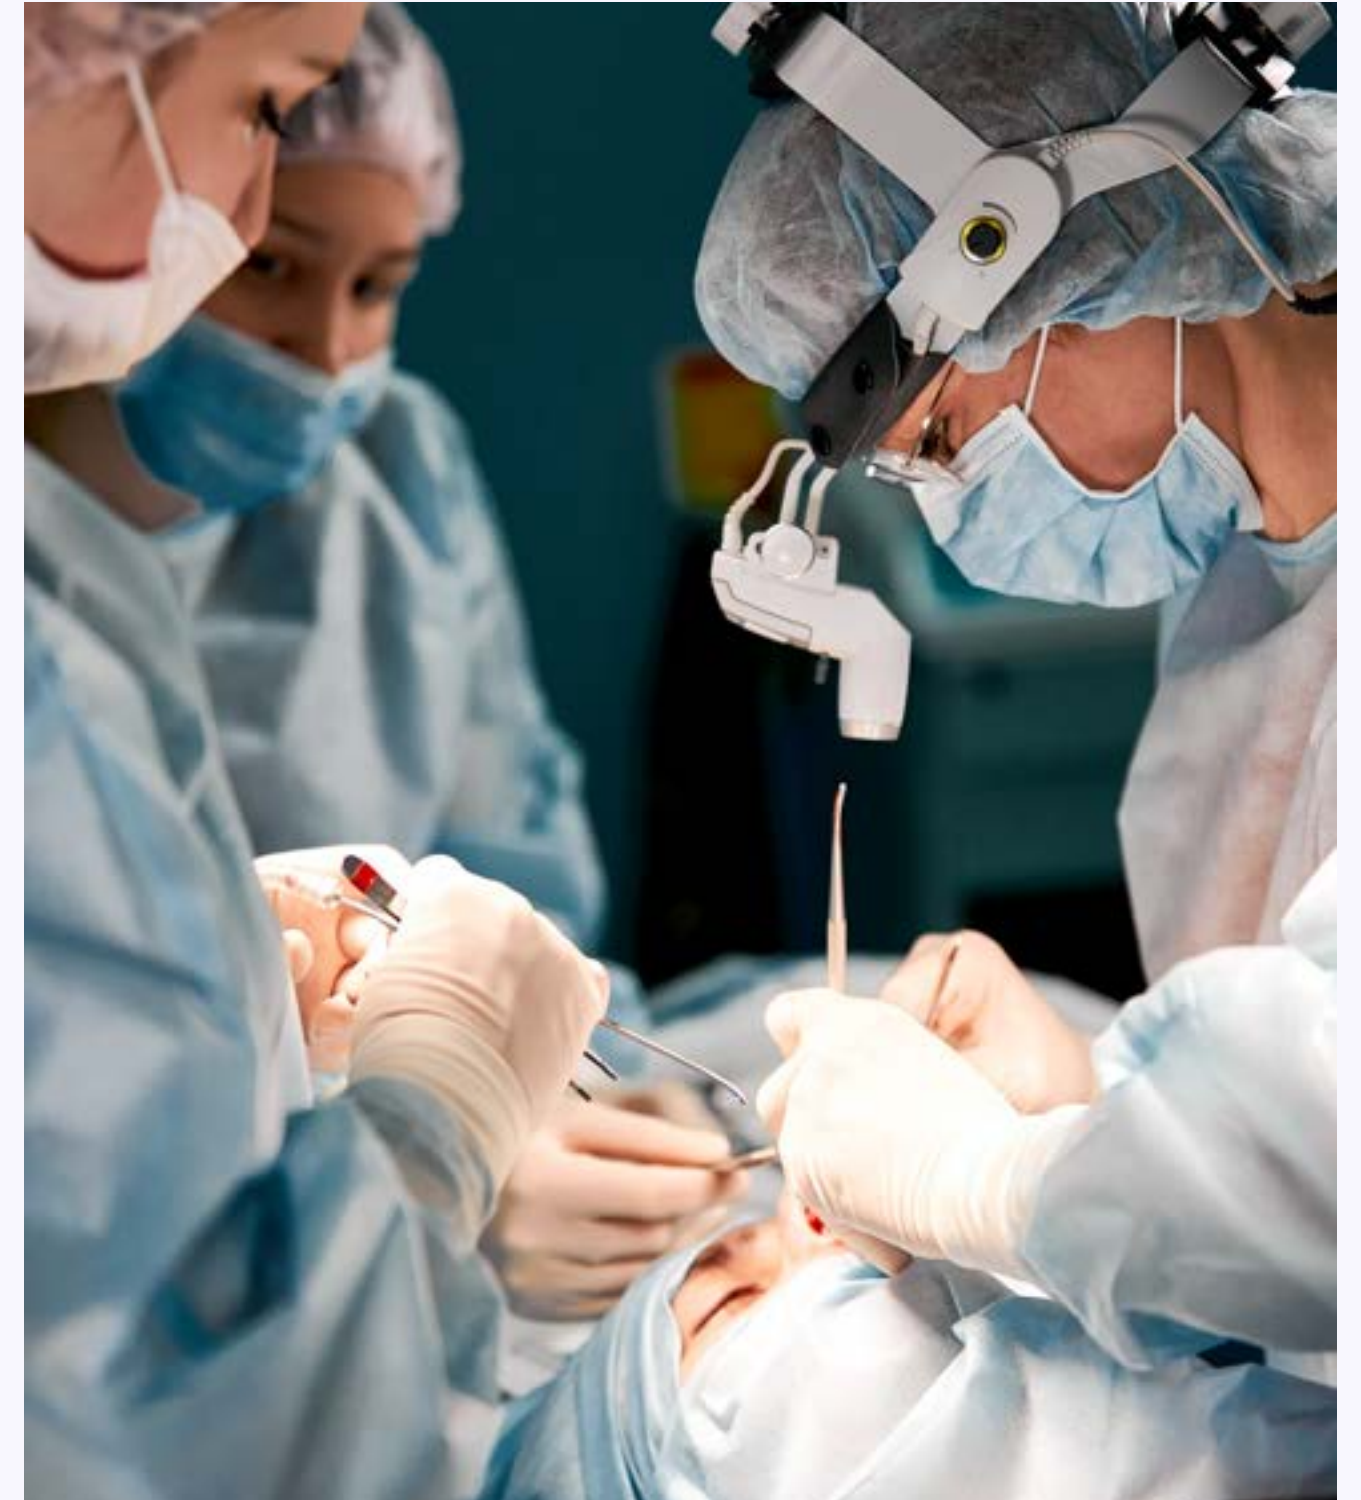

Functional rhinoplasty deals with restoration of functions of the nose i.e., nasal breathing, olfaction etc. Along with septal deviation correction, we have to address the lateral wall of the nasal cavity also in order to give normal breathing nose. Inferior turbinate hypertrophy, concha bullosa, sinusitis, nasal polyps are the common causes for nasal obstruction along with deviated nasal septum. We may have to combine endoscopic sinus surgery with septorhinoplasty if there is a need/requirement.

Who will be benefited by the workshop?

Any surgeon inclined towards rhinoplasty can join this workshop. Our main intention is to teach basics to advanced techniques of rhinoplasty.

After this workshop, Delegates must go with take home messages about the Prerequisites for a rhinoplasty clinic/practice, case selection, consent, photography, pre op preparation, surgical techniques, common complications and follow-up.

And also, we will distribute the copies of checklist useful for rhinoplasty practice.

COURSE HIGHLIGHTS

**Conventional
Septoplasty**

**Endoscopic
Septoplasty**

Closed Rhinoplasty

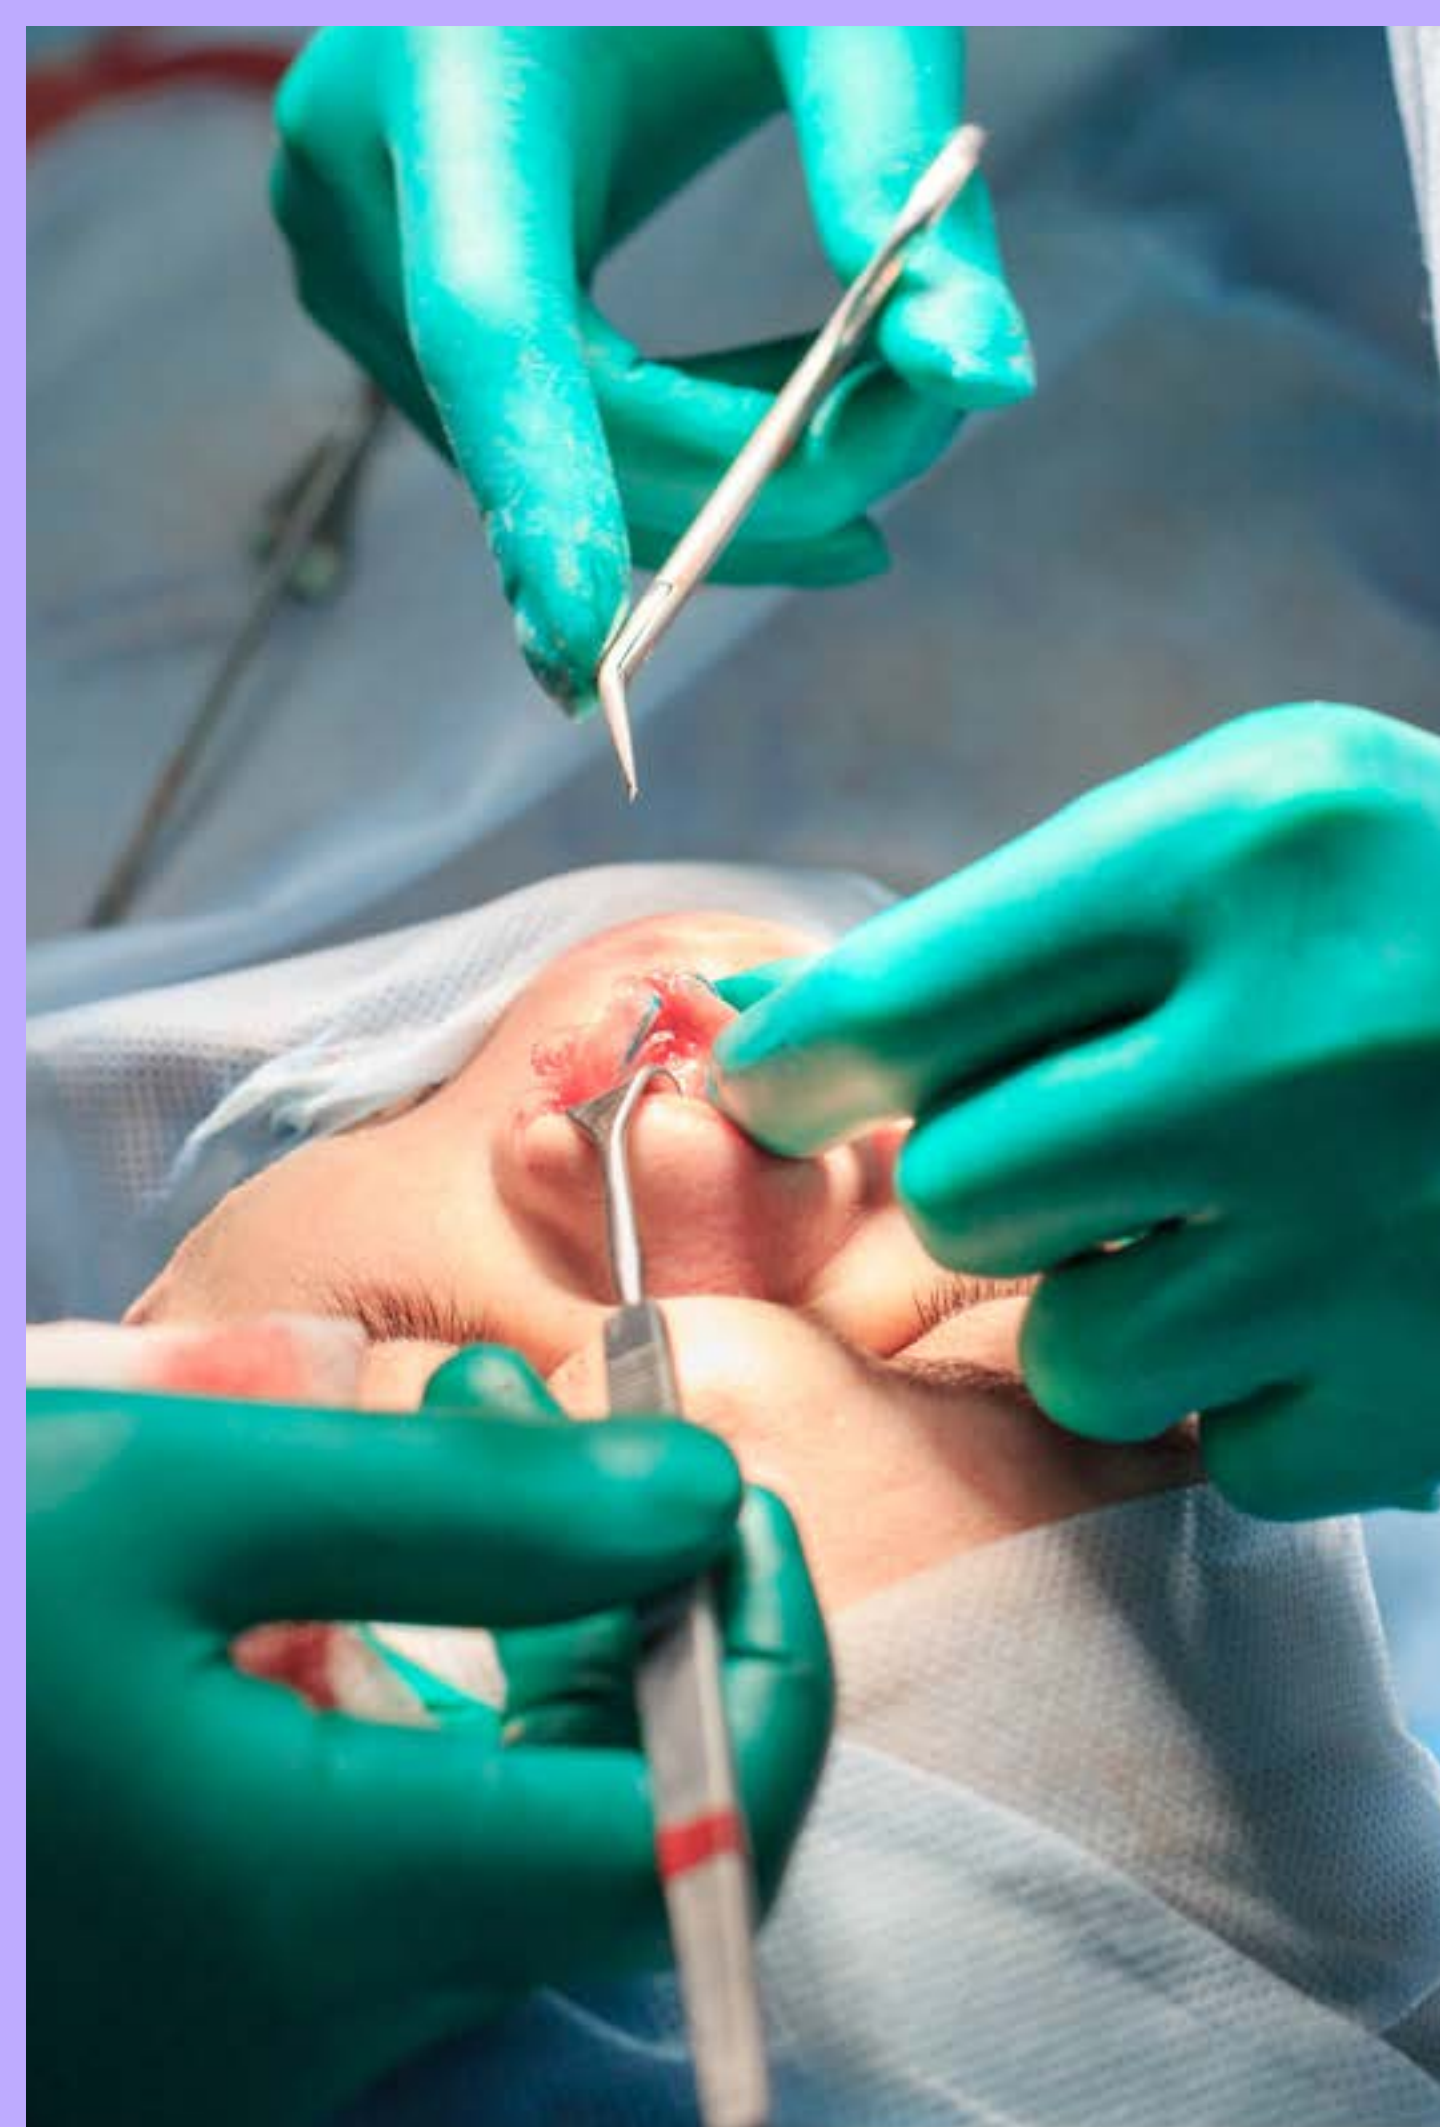

Open Rhinoplasty

**Extra Corporeal
Septoplasty**

**If Time Permits
Revision Rhinoplasty**
